

Fine  
Jewellery

**VIENNE**

[www.vienne.li](http://www.vienne.li)

**ZULTANITE lab created  
color change**

**NANOSITAL is the best, readily available rough jewellery  
material on the market.**

**NANOSITAL specific gravity index is very close  
to that of the most valuable gemstones such  
as topaz, sapphire, ruby and aquamarine.**

**NANOSITAL is one of glass-ceramic  
materials, which are known  
for more than 50 YEARS and have a wide range  
of compositions and applications**

**It is well-known that the above-mentioned oxides  
are key components of most natural gemstones. The rest  
of NANOSITAL'S components are picked to approximate  
the maximum  
required optical characteristics  
as well as density and hardness.**

**NANOSITAL not contain any health hazardous  
contaminants (lead, arsenum, cadmium)**

**Indoor light**

**Outdoor light**

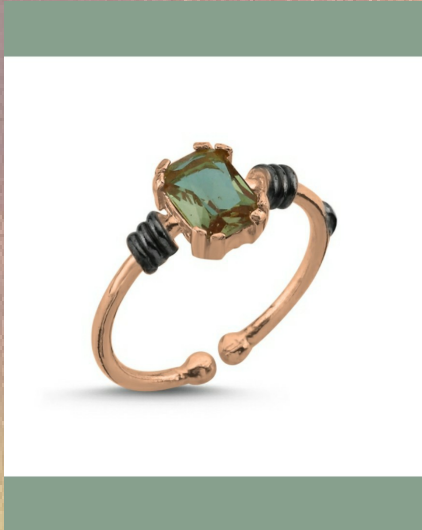

**Fluorescent light**

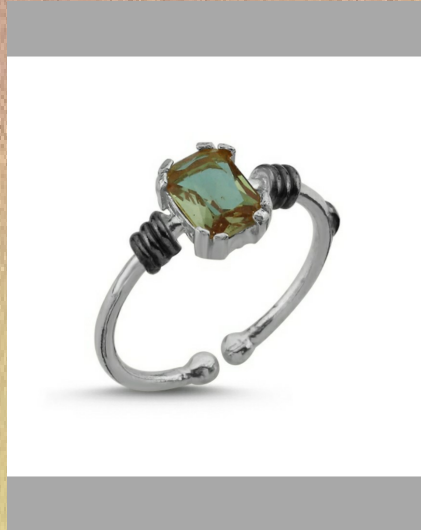

**Incandescent light**
